Introductory Microeconomics for Public Policy, PPPA 6017

Instructor: Benjamin Simon, (bsimon@gwu.edu), office hours by appointment.
Teaching Assistant: Roberto Delhy, (rdelhy@gwmail.gwu.edu), office hours TBD.

Course logistics
- Mondays, 6:10-8pm, Phil 640
- Discussion section: TBD

Key dates
- Midterm: March 27.
- Elasticity Memo Due:
- Exam 2: TBD

Course Description and Objectives
This course presents introductory and intermediate microeconomics, with a focus on policy-relevant topics and examples. Upon completing this course you should be able to:
- Understand microeconomic theory at an intermediate level
- Conduct graphical and algebraic quantitative analyses
- Apply supply and demand logic to policy problems
- Apply theories of public goods and tax incidence to policy problems
- Critically evaluate economic arguments in media and policy sources

Contact and Office Hours
Contact policy: I will do my best to answer emails within 24 hours during weekdays, or within 24 hours on the soonest weekday if you email on the weekend. If you do not hear from me within this time frame, you should assume that your email has been lost and you should re-send.
If you have missed a class, your first line of defense to ask what you have missed is another student.
I am happy to talk on the phone or via google hangout.

Prerequisites
None. If you have already taken microeconomics elsewhere, I suggest that you skip this class and enroll directly in 6014, Economics in Policy Analysis. If you have never taken economics and are a MPP student, this course is required. If you are unsure whether this course is for you, please email me.
This course requires a basic knowledge of linear algebra. Specifically, you need to know how to graph linear equations of the form $y = mx + b$, and how to solve two linear equations for two unknowns (this means find $y$ and $x$ in terms of $a$, $b$, $c$, and $d$, given $y = ax +c$ and $y = d - bx$). If you have not mastered these skills before the beginning of class, it will substantially hinder your ability to understand the economics. I want to be sure that you spend the class thinking about how math helps you tell an economic story, and not trying to understand how to manipulate algebra.
If you are concerned about your algebra abilities, or if you would like a refresher, you have multiple options. Please see the Math Review information under the Resources tab.

Readings
Required textbook: Goolsbee, Levitt and Syverson, *Microeconomics*. Selected chapters from Rosen and Gayer, *Public Finance*, Tenth Edition: Chapter 4, pages 54-70; Chapter 11, Social Security; Chapter 14, Tax Incidence. The textbook is available at the campus bookstore. While you are welcome to find alternative sources for purchase, you are required to cover the reading material assigned. I will distribute the readings from Rosen.

**Spring Break, Monday, March 13-Saturday -- March 18**

**Evaluation**
1. Problem Sets (15%)
   - Problem sets are designed to practice the skills we learn in class and prepare you for the exams.
   - Turn them in in class at the beginning of class that they are due.
   - There are 11 problem sets due during the semester. Eight will count toward your grade; you can choose to either skip three problem sets, or drop the lowest three grades.
   - I do not accept late assignments.
   - Problem sets will be graded on a check-plus (A), check (A-), and check-minus (B+) system.
   - You are welcome and encouraged to work with others, but you must each turn in your own work, in your own words.

2. Elasticity and Policy Memo (15%)
   - Paper is due at the eleventh class, at the beginning of class
   - Extensions will be given only the case of illness
   - Goal is to apply tools of elasticity to a policy of your interest
   - Any essays submitted late will decline by ten points for each twelve hours the essay is late, e.g. if the essay is due on Friday and is received Monday, if it would have received 70%, it now receives 30%
   - The paper should be no more than five pages.
   - I will hand out detailed instructions for this paper during our third class.
   - I encourage you to email or meet with me to discuss your project.
   - By class 8, you must turn in a draft for review by classmates.
     - This assignment is worth 10% of the overall memo grade, or 1.5% of your final grade
     - Turn in the paper to a google folder (instructions to follow)
     - Respond with comments by midnight April 10.
     - This assignment is graded by whether or not you have posted a draft, and the quality of your comments on others' work (check, check +, check -, as on the problem sets)
     - If you do not post a draft that is minimally sufficient (as I define on the handout), you cannot receive credit for this assignment.
     - For each 12 hours that the paper or comments are late, your grade declines by one letter.

3. Midterm Exam (20%)
   - This is a closed book exam covering all material in the course through this point.
   - You are free to use a calculator for the exam, but you are not allowed to use the programming function if your calculator has one.
   - Do not plan to use your mobile phone as a calculator

4. Exam 2 (30%)
   - This is a closed book exam covering all material in the course through this point, but with an emphasis on the latter half of the class.
   - You are free to use a calculator for the exam, but you are not allowed to use the programming function if your calculator has one.
5. Class Participation (10%)
   - Do not plan to use your mobile phone as a calculator
   - I expect that you will come to class having read the case study and ripped from the headlines material and prepared to engage with me and other students in discussing the material we are covering

6. Ripped from the Headlines (10%)
   - One to three students (depending on course size) chooses an article related to the topic of the course just covered
   - Article-choosing student must email me and the presenter the link to the article by Thursday noon prior to class (for the class the following Monday). I will ok the article; do not proceed without this ok.
   - One to three (depending on course size) students prepare short presentations (3 mins or less) on how the article supports or rejects hypotheses we've learned in class
   - I will provide a detailed handout for this assignment the first class
   - Grading:
     - B- or below indicates that the student made a substantial error in the application of course material
     - B indicates that the student identified some course-related content but may have misapplied some central issues
     - B+ is an average grade on this assignment: the student identifies some key issues from the previous class that are mentioned in the article
     - A- indicates that the student has done some more novel or creative or particularly clear interpretation.
     - A indicates that the student has both understood the article and its application quite well and has expanded on the concept in a meaningful way.

Trachtenberg School Course Policies

- The Syllabus
  This syllabus is your guide to the course. If any questions arise, please check the syllabus before contacting me or the TA. Sound educational practice requires flexibility and I may revise content and requirements during the semester.

- Late or Missed Class
  If you are late or absent from class, it is your responsibility to obtain all announcements, assignments, and handouts from this website or from your classmates. As participation is part of your grade, and because attendance in class helps you learn, missing many classes will be detrimental to your final grade. Missing one class should have no effect. You do not need to notify me in advance if you are going to miss class.

- Exam Dates
  Please notify me in the first two weeks of class if you are aware of a pre-existing conflict, such as a religious holiday you observe, that will preclude you from taking either exam at the assigned time. To the extent possible, we will work together to reschedule the exam as close to the original date as possible.
• Submission of Written Work Products Outside of the Classroom
   It is your responsibility to ensure that I receive your assignment on time. It is not permissible to submit assignments digitally unless I indicate so.

• Collaboration on Assignments
   You are welcome to work in groups; however, you are expected to write up your answers individually. This means that no phrases on your assignment should mimic phrases on any other student's work.

• Submission of Written Work Products after Due Date
   All work must be submitted by the assigned due date in order to receive full credit. Only extreme circumstances warrant exceptions. Late assignments will be marked down for each day that they are late.

• Academic Honesty
   All examinations and other graded work products are to be completed in conformance with the George Washington University Code of Academic Integrity. Note especially the definition of plagiarism: “intentionally representing the words, ideas, or sequence of ideas of another as one’s own in any academic exercise; failure to attribute any of the following: quotations, paraphrases, or borrowed information.”

• Incompletes
   You must consult with me to obtain an incomplete no later than the last day of classes in the semester. At that time, we will both sign the CCAS contract for incompletes and submit a copy to the School Director. Please consult the TSPPPA Student Handbook or visit this link for the complete CCAS policy on incompletes.

• Changing Grades After Completion of Course
   No changes can be made in grades after the conclusion of the semester, other than in cases of clerical error.

• Accommodation for Students with Disabilities
   If you need extra time on exams or assignments due to a disability, let me know in the first week of class. In order to receive accommodations on the basis of disability, you'll need to provide proper documentation to the Office of Disability Support Services, Marvin Center 436, 202-994-8250. Accommodations will be made based upon the recommendations of the DSS Office.

• University Counseling Center
   The University Counseling Center (UCC), 202-994-5300, offers 24/7 assistance and referral to address students' personal, social, career, and study skills problems. Services for students include: crisis and emergency mental health consultations; confidential assessment, counseling services (individual and small group), and referrals

• Religious Holidays
   If you need to miss a class to observe a religious holiday, please notify me the first week of classes about any conflict; we will arrange an absence without penalty.

• Out of Class Learning
   Average minimum amount of independent, out-of-class, learning expected per week: In a 15 week semester, including exam week, students are expected to
spend a minimum of 100 minutes of out-of-class work for every 50 minutes of direct instruction, for a minimum total of 2.5 hours a week.
